

Products For Building Green, Respecting The Environment And Protecting People.

*For projects seeking official “green building” certifications and for construction processes mindful of our planet and its inhabitants, choose products that have been **Green ENGINEERED™** for the optimum combination of safety, environmental care and performance.*

Green ENGINEERED™

FORM RELEASE AGENTS

Alumi-Con	Alumi-Nox E
Bio-Nox	Form Clean E
Multi-Nox	Nox-Crete Form Coating E
Nox-Crete Form Coating EB	PCE
Pallet-Nox	Peak Release
RA #10 E	Utility Release

FORM TREATMENTS

Edge-Flex 235

TILT-UP CURE & BONDBREAKERS

Silcoseal Select
Silcoseal 2000F

CURES, SEALERS & HARDENERS

Bro-Cure	Cure & Seal 100-300 E
Cure & Seal 1200 E	Duro-Nox
Duro-Nox Ultra	Duro-Polish
Duro-Polish Plus	Resin Cure E
Sparkl-Seal E	

JOINT FILLERS

Clean Shave

FORM MAINTENANCE & CLEANING

Deactivator E
Form Clean E

CONCRETE CLEANERS

Bio-Clean
Bio-Strip

EVAPORATION REDUCER

Monofilm

WATER REPELLENTS/SEALERS

Stifel GC
Stifel HC
Stifel SC
Stifel VC

BONDING & PATCHING AGENTS

Acryl-Binder
Vinyl-Hesive

DECORATIVE STAIN/SEALER

Versacryl

FLOOR COATINGS

Dauerseal 30E
Dauerseal 60E

Today's design and construction professionals must navigate constantly changing benchmarks for sustainable design, project certifications, environmental protection and worker safety.

Green ENGINEERED™ products from Nox-Crete are performance-driven products designed to the highest quality standards using the safest ingredients available.

With **Green ENGINEERED™** products, design and construction professionals can meet the expectations for project design and construction without compromise to product performance or the world we share.

The cornerstone of our **Green ENGINEERED™** concept is our research and development of **water based formulations**. By using water based products, the impact on **non-renewable resources** such as petroleum and its distillates is reduced. The base for any **biodegradable** product, the best eco-friendly choice, is water. Workers who apply water based products are exposed to fewer harmful substances. The **low VOC** nature of water based products lessens both the impact on air quality and on workers' health. Water based products also are **low odor**, creating a more pleasant work environment.

The Benefits Of **Green ENGINEERED™** Products Include:

Sustainability

A number of our products help **increase the life cycle** of a structure, lengthening the time from construction to debris. This reduces the **impact on our landfills** and our ever-shortening supply of arable land.

Energy Savings

We offer products which create more reflective floor surfaces. More light reflectivity means **less energy use** for lighting and an improved **indoor environment** for occupants.

Maintenance Savings

Our products for floors also make after-occupancy maintenance of floors easier and more effective, requiring **less water, energy and chemical cleaner usage**.
